

ROB CANDLER, PE

Director of Industrial Design Studio

With over 25 years of engineering experience, Rob Candler is a trusted civil engineer licensed in 15 states. He specializes in industrial development projects, including heavy automotive, petrochemical plants, warehousing, logistics, and distribution centers, bringing deep industry insight and a practical, solution-oriented mindset to every job.

Rob is known for delivering innovative and cost-effective engineering solutions that help clients stay on time, on budget, and aligned with their long-term goals. He holds both a bachelor's and master's degree in engineering from the University of Louisville as well as a certificate in environmental engineering to further support sustainable and future-ready project development.

Always keeping an eye on emerging technologies, Rob is passionate about how today's tools and innovations can improve industrial design and execution. Clients appreciate his blend of technical expertise, strategic thinking, and real-world experience earned over two decades in the field.

Outside of work, Rob enjoys traveling, golfing, and cheering on his kids as a dedicated sports parent, bringing the same passion and focus to life as he does to every project.
